

2024 PNW Urban Wood Drying Workshop

North Carolina State University Wood Products Extension and OSU's Oregon Wood Innovation Center have teamed up to conduct an urban wood drying workshop.

Proper drying is key to processing freshly milled boards & slabs into valuable, high quality, marketable products. This workshop will provide you with the knowledge to better control drying in your urban wood operation & resources to develop a strategy & implement best practices.

July 29th – 31st, 2024

Everett Hall
Hopkins Demonstration Forest
16750 S. Brockway Road
Oregon City, OR 97045

Lectures by NC State's [Frederik Laleicke](#) & OWIC's [Scott Leavengood](#)

The workshop includes lectures, hands-on activities & labs:

- Urban wood philosophy & business culture
- Introduction to wood ID
- Wood & moisture
- Urban wood kilns
- Measuring & monitoring moisture
- Urban wood drying quality
- Resources, literature & training

Moisture content tracking & monitoring round table discussion.

What are your best practices? What works well for others?
